**Digital reports, delivered fast.**

MOBILE FIRST

The WTR platform is cloud based group of applications (web, desktop & mobile) for patients and doctors to obtain accurate medical reports (Hemogram/ blood sugar report etc.) online in a secure manner. The reporting system also helps Labs to store their data digitally and generate reports on demand.

OS: Android, Swift

Domain: Healthcare

The WTR app enables the client to receive his clinical reports from labs, exceptionally fast, in a PDF format. The app facilitates communication between the client and the doctor.

Key Services and Technologies delivered:

Android

- REST API calls to send and receive data from server.
- PDF Viewer

Swift

- NSJSON Serialization to fetch data from server.
- Delegate for sound reusable design pattern implementation.
