

DevOps at VAST

At VAST we believe DevOps as a culture/ environment where there is an agile relationship between operations and development team. Thereby, setting up better and frictionless collaboration and communication amongst the two business units to rapidly deliver effective, reliable and quality solutions.

Empowering clients with secure, automated and seamless DevOps solutions, ensuring a transformative and optimized software development lifecycle providing operational efficiency & flexibility.

Why DevOps at VAST?

- Globally experienced hands-on resources
- Offshore based end-to-end delivery
- Excellent Offshore Infrastructure
- Talk, Adapt and Improve
- Atop latest Tools & Technologies
- Agile Practices
- Timely Staff Up Solutions

How can DevOps at VAST benefit you?

- Never letting you bottleneck on Operations and Process- "Focus on business rather than operations".
- Release new features faster for "Early Time to Market" - "Predictable and Reliable CI/CD Pipeline".
- Providing a transparent outlook of business- "Evangelize DevOps".
- Recommending right Cloud solutions to suit your requirement - "DevOps Consulting".
- Recommending microservices based scalable architecture - "Industry proven 12-Factor App methodology".
- Letting you Migrate existing infrastructure to and across Cloud- "Resilient cloud migration strategy".
- Automating Process and Operations in couple of weeks to save you big on time and resources - "DevOps 2.0".
- Creating a self-service culture and empowering engineers by giving them better control of operations and SDLC. - "Effective Team Collaboration (Architects, PM, Dev, QA, Ops)".
